Informed Consent to Care

You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as "informed consent" and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.

We may conduct some diagnostic or examination procedures if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable.

Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain in the joint, and improving neurological functioning and overall well-being.

It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms, burns and/or scarring from electrical stimulation and from hot or cold therapies, including but not limited to hot packs and ice, fractures (broken bones), disc injuries, dislocations, strains, and sprains. In addition, the literature recognizes an association between strokes and chiropractic manipulation of the cervical spine. With respect to strokes, there is a rare but serious condition known as an "arterial dissection" that typically is caused by a tear in the inner layer of the artery that may cause the development of a thrombus (clot) with the potential to lead to stroke. The best available scientific evidence supports the understanding that chiropractic adjustment does not cause a dissection in a normal, healthy artery. Disease processes, genetic disorders, medications, and vessel abnormalities may cause an artery to be more susceptible to dissection. Strokes caused by arterial dissections have been associated with over 72 everyday activities such as sneezing, driving, and playing tennis.

Carotid and vertebral artery dissections are rare, with an annual incidence of 2.5-4 of every 100,000 people whether they are receiving health care or not. Patients who experience this condition often, but not always, present to their medical doctor or chiropractor with neck pain and headache. Unfortunately, a percentage of these patients will experience a stroke.

The reported association between visits to a chiropractor or a primary care physician and stroke is exceedingly rare and it estimated to be related in one in one million to one in two million visits.

It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. Likely, you have tried many of these

approaches already. These options may include, but are not limited to: self-administered care, over-the-counter pain relievers, physical measures and rest, medical care with prescription drugs, physical therapy, bracing, injections, and surgery. Lastly, you have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.

I have read, or have had read to me, the above consent. I appreciate that it is not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.

HIPAA COMPLIANCE PATIENT CONSENT FORM

Our Notice of Privacy Practices provides information about how we may use or disclose protected health information.

The Notice contains a patient's rights section describing your rights under the law. You ascertain that by your signature that you have reviewed our Notice before signing this consent.

The terms of the Notice may change, if so, you will be notified at your next visit to update your signature/date.

You have the right to restrict how your protected health information is used and disclosed for treatment, payment or healthcare operations. We are not required to agree with this restriction, but if we do, we shall honor this agreement. The HIPAA (Health Insurance Portability and Accountability Act of 1996) law allows for the use of the information for treatment, payment or healthcare operations.

By signing this form, you consent to our use and disclosure of your protected healthcare information and potentially anonymous usage in a publication. You have the right to revoke this consent in writing, signed by you. However, such a revocation will not be retroactive.

By signing this form, I understand that:

- Protected health information may be disclosed or used for treatment, payment or healthcare operations.
The practice reserves the right to change the privacy policy as allowed by law.
- The practice has the right to restrict the use of the information but the practice does not have to agree to those restrictions.
- The patient has the right to revoke this consent in writing at any time and all full disclosures will then cease.
- The practice may condition receipt of treatment upon execution of this consent.
